## INTRODUCTION

Committed and Enthusiastic QA Analyst/SDET & Back-End Developer. Years of Manual Testing + QA Automation & Back-End programming experience. Deeply driven, engaged, and responsible individual with proficient skills, and a proven record of accomplishments in QA & Development fields.

Understanding the full software engineering cycle which starts with analyzing and comprehending client's requirements, working with developers in bringing solutions that fulfill client's expectations within budget and schedule constraints, and helping shape the overall software architecture by conducting design and code reviews, test cases, test automation and focusing on the quality assurance of the project.

## SKILLS

Proficient in LAMP Stack, worked with agile methodology using Scrum.

- Programming / Web: Rest Api, Laravel. PHP, Bootstrap/CSS, Javascript, Java, JSON, XML and SQL.
- Databases: Postgres, Mysql, and SQL Server.
- Testing Framework/Software: PostMan, Chrome DevTools, JMeter, Selenium, IBM RFT, Cucumber and TestCases.
- Version Control & Automation: Git, GitKraken, Bitbucket, Jenkins, and Cruise Control.
- Documentation & Project Management: Jira, Confluence, and Scrum.

## EDUCATION

**POSTGRADUATE: MASTER'S IN SOFTWARE ENGINEERING** - Federal University of Rio de Janeiro

**BACHELOR'S DEGREE IN COMPUTER SCIENCE** - Unicarioca University

## TECHNICAL COURSES & LANGUAGES

- **Quality Assurance Engineer / SDET** – Test Pro
- **New Technologies Programming** – PUC RJ University
- **WebDeveloper** - Intreino IT
- **WebDesigner** - People & Computer
- **Java Developer** - NSI Training

- **PORTUGUESE ( NATIVE ), ENGLISH ( FLUENT ) AND SPANISH ( ONLY UNDERSTAND )**

## PROFESSIONAL EXPERIENCE

- **Test Pro ( San Antonio, TX - US ) July 2024 - Current**  
QUALITY ASSURANCE TESTER / SDET - Internship
  - Manual Tester ( Black Box/Functional/Regression Testing )
  - Automation Tester ( Selenium, Java, Postman, Chrome DevTools, Cucumber )
  - Manage/Track Test Cases & BugTrack ( Jira & Confluence )
- **International Brangus Breeders Association ( San Antonio, TX - US ) November 2020 - Sep. 2023**  
BACK-END & API DEVELOPER / TESTER
  - Developed and maintained a complex online cattle management system, PHP and Laravel Framework, with over 1 Million animals registered and over 100K members.

- Collaborated with front-end developers to implement APIs for new functionalities, such as enabling online payments and management; Cattle Parentage Verification/Validation (DNA comparison between Progeny, Dam, and Sire ), Queue ( scheduled routine for Geneticist to qualify parentage ) and Resolution ( Breeders option to confirm parentage and/or add more Animals to be compared ).
  - Implemented integration with online payment (Stripe) and accounting software (Quickbooks).
  - Responsible for API Testing of the developed APIs and Manually Testing new features.
  - Technologies/Software commonly worked on: PHP ( VS Code ), Laravel, Postgres ( PgAdmin / Navicat / DBeaver ), BitBucket ( GitKraken ), and SSH ( Putty / Filezilla ).
  - Other Technologies: Selenium & Jenkins
- **SONAR TRADE ( Brazil / US ) July 2020 - November 2020**  
FREELANCER STACK DEVELOPER
  - PHP/Mysql Developer and Responsible for the REST API integration (mobile & backend) with the OMS (order management system) which allows premium clients to execute recommendations from the mobile app.
  - Developed Websocket integration using NodeJS (server) to manage the OMS with data analysis and MySQL database.
- **IBENCH MARKETPLACE ( Brazil - RJ ) August 2018 - May 2020**  
FULL STACK DEVELOPER / SCRUM MASTER / QA
  - Laravel/PHP/Mysql Lead Developer and Responsible for project management of a small group of developers, task assignments, planning, testing, and implementing iBench Front-End and Back-End.
  - Developed features such as Wish List, Waiting List, Stock Management, Gateway Payments, REST API, Shipping, Shopping Cart, Bulk Import/Export, and many others using PHP, MySQL, Javascript, Ajax, and JQuery.
  - Responsible for database management, creating tables and triggers, and testing UI components.
- **TECGRAF / PUC – RJ (Computer Graphics Technology Group) August 2006 - May 2017**  
QUALITY ASSURANCE ANALYST / SDET & DEVELOPER
  - Quality Assurance – Test Case development and verified daily software build using a quality assurance plan, manual and automated testing, and unit testing on various systems.
  - Bug management and error tracking with test report documentation
  - Continuous integration using Jenkins & CruiseControl.Net
  - Project management through Jira and Documentation by Confluence.
  - Java & C# Programmer for various tasks needed.
  - Database scripting ( MySQL, MS SQL, and Oracle )

## COMPANY PROJECTS

### IBBA ( INTERNATIONAL BRANGUS BREEDERS ASSOCIATION )

- **IBBA** - Brangus Breeders Association that provides innovative programs and services that enhance the economic well-being of its members and commercial customers.
  - ❖ **Ibba Registration System** - Refactored legacy code and updated with current demands.
  - ❖ **Online Payment and Management System** - Implemented for users to pay online and for the accounting staff to manage through QuickBooks.
  - ❖ **Internacionalization & ABM Migration + Legacy Data** - Internacionalization for Mexico Association and worked on the migration and parsing of their data to our system.

Site : <https://brangus.goregstr.com/>

## **SONAR TRADE**

- **Stock Market App** - Sonar Trade App allows users to invest in stocks, get recommendations, follow portfolios opening/closing positions, and much more.
  - ❖ **OMS Integration** - Implemented integration with a third-party Order Management System to allow users to buy and sell stocks.
  - ❖ **Mobile Api & Api Testing** - Responsible for implementing and testing REST Apis to communicate between Sonar Trading App and our System/Database.

Site : <https://sonartrade.com.br/>

## **IBENCH MARKETPLACE**

- **Ibench** - PHP and Laravel E-commerce Marketplace design for scientists and vendors.
  - ❖ Working daily with the StartUp Team, Clients, and Sellers to meet their demands in daily or weekly Scrum meetings and video conferences.

Site : <https://ibench.com.br/>

## **STRATEGY**

- **CVC Booking Application** - Support the e-commerce platform and database.
- **Elearning Platform** - Developing and maintaining front-end and back-end functionality.

## **TECGRAF / PUC – RJ**

- **SIAE** - ( Computerized Emergency Support System )
- **INFOPAE** - ( Emergency Plan Deployment System )
- **MAPS** - ( System for Elaboration of Environmental Spill Oil Sensitivity Maps )
- **FENIX** - ( Processes data from oil reservoirs showing the information through analytics charts )
  - ❖ Scrum meetings with the developers to Audit and guarantee Quality Assurance using the BDD Approach.
  - ❖ Developing and Creating Automated Functional Testing Cases with Selenium and IBM RFT.
  - ❖ Developing in C# and Java Unit Testing, Continuous Integration & Delivery, and Increasing the productivity of the team with the reuse of API services.
  - ❖ Agile Development Environment using different tools and platforms such as Jira, SVN, GIT, Selenium, and IBM RFT.
